

Marc Barbry
Centro de Física de Materiales CSIC-UPV/EHU

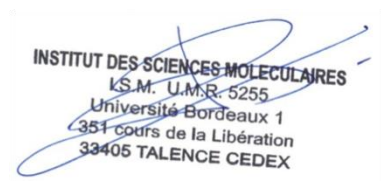

Bordeaux, May 5th 2017

Dear Mr. Barbry,

You may know that the University of Bordeaux is launching a week of international symposia from June 26th to June 30th, 2017 (Week 26 - <http://symposiumbordeaux-euskampus2017.u-bordeaux.fr>). One of the main objectives of this event is to develop the existing collaborations with strategic partners, including Euskampus Community. Within this general context, the Transborder Joint Laboratory QuantumChemPhys, created by the University of Bordeaux (UBx), the Basque Country University (UPV/EHU) and the Donostia International Physics Center (DIPC), is organizing one of the parallel workshops, with the title *"Theoretical chemistry and physics at the quantum scale"*.

On behalf of the organizers, it is our pleasure to invite you to participate in this workshop and deliver an invited talk covering your most recent work. Our invitation covers the travel and accommodation expenses for the workshop.

We sincerely hope that we can count on you for the scientific program of the meeting. If you are willing to accept this invitation, please let us know a tentative title of your talk. Looking forward to your response,

Pascal Larregaray & Ricardo Díez Muiño
Coordinators of the workshop
"Theoretical chemistry and physics at the quantum scale"
